

DURACOAT CLEAR

CLEAR AEROSOL STRAIGHT UP SPRAY PAINT CANS DURABLE POLYURETHANE COATING.

High performance, solvent based, extremely durable, easy to use, self-curing, interior or exterior use. **One component CLEAR alkyd-polyurethane coating.** Packaged straight-up spray aerosol spray cans. Formulated to wet out and bond tenaciously to a variety of substrates. Dries fast to yield a tough gloss clear coating. Use as a protective coating for unpainted substrates or as a clear coat over painted surfaces as clear protective top coat for vertical surfaces.

DURACOAT clear is extremely durable, top quality solvent-based alkyd-polyurethane co-polymeric coating. Conveniently packaged in **straight up spray aerosol spray cans.** No thinning or mixing or spray equipment required. Just shake cans till the ball rattles and spray. **Product contains high solids and high resin content to yield a very tough, durable, weather resistant, chalk resistant, chip resistant, rust resistant coating when dry.** It can be applied on interior or exterior substrates. Even though it is designed for paint metal surfaces it works very well on several other substrates. Use as a protective clear top coating over already painted surfaces. Protects against weathering, scratching, chipping, staining and dirt pick-up. Being solvent based it is flammable. Contains no lead, chromium or harmful CFC's.

- **CLEAR, Fast Dry, High Solids, conveniently packaged in no clogg, no waste aerosol cans.**
- Polyurethane Resin for exterior Durability, Good Adhesion, Flexibility, Non-chalking, Chip and Flake resistant.
- Paint/Coat directly over concrete, wood, metal surfaces without need for elaborate surface preparation.
- Paint over already painted surfaces as a clear, compatible clear protective top coating.
- **Top coating protects base coat against weathering, scratching, chipping, staining, tire marks, dirt pick up.**
- High Performance, easy to use, no need of mixing two components as with 2C catalyzed polyurethanes.
- Being solvent base aerosol paint, it is a FLAMMABLE product. Please use caution and safety procedures.
